### **ROTARY TABLE: classic line / vision line**

inForm.Intro

Dear readers,

It is always surprising how quickly time flies. Now we are already in autumn and a successful year is coming to an end. In this year, I realized again how strong and innovative the team behind us and our company is. This makes us strong as a company from Baden and we all look forward with confidence to the future.

But first, we are approaching with giant strides the industry event FAKUMA fair in Friedrichshafen. My team and I look forward to welcoming our customers there. Interesting molds, interesting discussions...

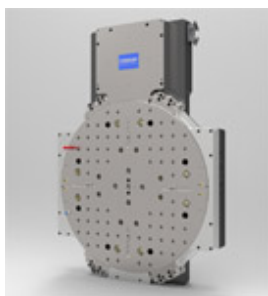

Best regards  
Erich Braun

### **FAKUMA 2012 fair**

Visitors of the FAKUMA 2012 can convince themselves of the solution competence and the 35-year experience of Braunform GmbH three times: Different molds will be on display at the booth of two partners of the plastics industry as well as at the own presence.

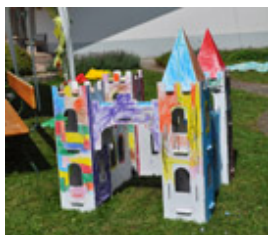

## The new rotary table concept of Braunform GmbH offers many advantages to customers.

While the “Braunform classic line” offers the best value for money without special options the “Braunform vision line” leaves nothing to be desired.

The rotary table technique of Braunform offers all opportunities to work with multi-component tools, yet more imaginative, faster and more efficiently, and this in continuous use over years. An excellent investment - and for good reason: The enduring quality of the rotary table with an accompanying low maintenance requirement results in long operating times and reduces costly downtimes and maintenance intervals.

## Bright children's eyes at Braunform activity day for children

On Friday, 03 August 2012, the first Braunform activity day for kids of Braunform employees took place in the tennis centre of Bahlingen. The plan of the members of the HR-marketing team at Braunform to offer the children a great, memorable day and at the same time to give the parents a day off from their duty of supervision, was a great success. Both children and their parents were thrilled of a day full of fun, games and action.

## Braunform will be represented at following events:

26+27/09/2012 Kunststoff fair, Netherlands  
 27/09/2012 Colloquium Meusburger, Emmendingen, Germany  
 11-13/10/2012 Science Days, Europapark Rust, Germany  
 16-20/10/2012 FAKUMA fair, Friedrichshafen, Germany
