Online-News for Plastics and Pharma Technologies

inForm.Intro

Dear readers,

We are pleased to report on a lot of positive news of Braunform in this newsletter - and that in wide-ranging topics.

The seal "Innovation through research" and the "Top Job" award make us proud because they underline two important goals in our company: customer satisfaction through innovative technology and employee satisfaction due to high identification with the company and our products as well as a high job security.

With best wishes for a pleasant summer time, until our next newsletter in autumn.

Erich Braun Pamela Braun

Braunform has been awarded with the seal "Innovative by research"

As one of Germany's biggest private academic patron, the „Stifterverband“ appreciates companies which are engaged in the field of research and development.

Braunform is "Top Employer 2014" in Germany

The company is one of the best employers of the German medium-sized companies (SME), and for that it has been awarded with the "Top Job" Award. Wolfgang Clement, former German Federal Minister of Economics and Labour (2002 to 2005), presents the "Top Job" award at the awarding ceremony in Essen, Germany.

Arrival of a new deep-hole drilling machine Samag TFZ 2-1000

This month a new deep drilling milling center arrived at Braunform's mold shop. This new Samag TFZ 2-1000 machine has diverse advantages for customers and Braunform. One advantage is a bigger working plane and a more specifically and precisely drilling. Additionally a faster retooling because of the integrated zero point clamping system is possible. Also the user profits from this investment. The machine uses cooling emulsion instead of oil and is more comfortable to work with. The machine is also a combination of drilling and milling functions.

Braunform congratulates trainees on successful passed exam

A total of five trainees have finished their three-and-a-half year training period (tool mechanics, technical draftswoman and electronic technician (m/f) successful.

In-house exhibition of Ferromatik Milacron

This year we presented Braunform at the in-house exhibition of Ferromatik Milacron. The machine manufacturer started a partner exhibition at their plant in Malterdingen which is located only 10 minutes away from our plant in Bahlingen.

We would like to thank all visitors for the interesting conversations.
