## 12.2014

Online-News for Plastics and Pharma Technologies

inForm.Intro

Dear readers,

End of the year is traditionally a time when many of us reminisce the past few months and look with curiosity to the future. Each of us had memorable experiences that stay for a long time, and came to more or less well-considered decisions we reflect again these days. We hope that you can take some time for this reflection, even though the omnipresent Christmas bustle may not allow it. And we hope that the result in total is positive.

We are grateful for lots of successful moments and experiences with you in 2014 and for your loyalty to our company. We appreciate your recognition as our motivation in our daily work. We are looking forward to give all our strength for your satisfaction in the coming year.

With best wishes for a Merry Christmas together with your families and a great start to the New Year 2015,

Pamela Braun

Erich Braun

### „Braunform – socially engaged“: Donation to „Médecins sans Frontières“

In addition to the support of projects proposed by employees, Braunform also donates 4.000 € to the international organization „Médecins sans Frontières“. The Ebola epidemic in South Africa is just the tip of the iceberg of worldwide emergency medical assistance in over 60 conflict affected countries that the humanitarian organization

coordinates.

### Science Days - Braunform produces Yo-Yos directly at the booth at this special event for young people.

For the third time Braunform participates at the Science Days. This is an event especially for young students and kids to get the chance to experience science while taking part at different workshops and science shows. From 16th to 18th of October 2014 nearly one hundred exhibitors show exciting experiments guided by experts.

### At Braunform the project "energy detectives" has proven successful.

The certification of the energy management according DIN EN ISO 50001 is not the only reason of the high importance of energetic aims at Braunform. The trainees regularly identify potentials for energy savings as "energy detectives" - Searching for some real "energy guzzlers", e. g. compressed-air leakages, scanning the building by a thermal camera or checking all the lights of the business premises.
