Online-News for Plastics and Pharma Technologies

inForm.Intro

Dear Readers,

Christmas is coming and an eventful year is drawing to its end. For the turn of the year, we wish you the silence to reflect and the courage to define the right decisions for you. With this Christmas greeting, we would like to emphasize our thanks and appreciation for your trust and the good cooperation in the past year. We are looking forward to an exciting 2016.

We wish you and your families a Merry Christmas and a peaceful New Year!

Pamela Braun

Braunform – we act

Also in 2015 the social point of view “Braunform – we act” is firmly anchored in the company’s policy. In this year the company supported employee projects with an amount of € 3,500. Furthermore Braunform dispensed since several years with sending Christmas presents to customers and instead donates to socially engaged organizations. This year Braunform donated directly to the protestant church community in Bahlingen supporting children in a refugee camp in Northern Iraq and to the association for children with cancer e. V. in Freiburg.

25 years rotary table technology at Braunform - compact, secure and fast!

The rotary table concept of Braunform GmbH offers many advantages to customers. While the "Braunform classic line" offers the best value for money without special options the "Braunform vision line" leaves nothing to be desired.

The rotary table technique of Braunform offers all opportunities to work with multi-component tools, yet more imaginative, faster and more efficiently, and this in continuous use over years. An excellent investment - and for good reason: The enduring quality of the rotary table with an accompanying low maintenance requirement results in long operating times and reduces costly downtimes and maintenance intervals.

The "classic line" up to BRT 1000 disposes of a selection of six standardized media delivery systems. The Braunform "vision line" includes all rotary tables with additional options on request as well as the series BRT 1100 to 1400. Due to a wide range of options and choices an individually perfectly adapted rotary table can be configured.

A big crowd of people at the Science Days 2015

For the fourth time Braunform participates at the "Science Days". During the three-day event from 22th to 24th October 2015 numerous young students get the chance to experience science while taking part at different workshops and shows - under this year's main topic "light". At our booth visitors could build in several working steps such as drilling and sawing their own smartphone cradle with engraved name.

Investments in machinery - second half-year 2015

Outstanding customer benefit and a high customer

satisfaction are firmly anchored in the company's philosophy as the ultimate ambition. By investing in machinery the requirements of our customers can be reliably fulfilled. Here is an insight into the investments for the mold shop:

A new PEMAMO honing machine provides greater accuracy and fulfills highest requirements regarding surface quality. The investment in a new hard turning lathe from the brand Hardinge serves to technological extension of the cylindrical grinding. A new Mazak turning lathe allows a more modern machining of molds and components. By investing in a new Sisma laser marking machine surface finish engraving can be produced, for example.

Events

21.01.2016: **Horber Mold Day**, Horb a. N., Germany

10.02. - 11.02.2016: **PHARMAPACK**, Paris, France

Merry Christmas | Frohe Weihnachten | Feliz Navidad | Joyeux Noël

We wish you and your families a Merry Christmas and a Happy New Year.
