Online-News for Plastics and Pharma Technologies

inForm.Intro

Dear Readers,

Again a year is coming to an end. Many use the end of the year to revive the past and look with curiosity to the future. For us, 2016 was an eventful year: The successful implementation of an integrated management system according to DIN EN ISO 15378 as well as DIN EN ISO 13485 and also the entry into the new production building in Endingen next to Bahlingen were essential milestones of Braunform's history. Our event highlight was the K fair 2016 in Düsseldorf, Germany, with many interesting conversations and great impressions. In the context of health management, the HR marketing team has set up the first Braunform Health Day. And with the start of the education in September, the 250th trainee was hired.

We would like to thank you for the good cooperation and your trust. We wish you and your family relaxing holidays and a Happy New Year 2017!

Warmest Greetings
Pamela Braun

For Braunform it is important to support socially engaged organizations and projects on a sustained basis

Since several years Braunform has dispensed with sending Christmas presents to customers and instead donates to socially engaged organizations.

"We for your future" – Training concept of Braunform GmbH shows effect

Not only in the course of demographic change and the resulting shortage of skilled workers, many companies have pushed the training of young specialists. With the training start in September 2016, the 250th apprentice was recruited. [read more >>](#)

In September 2016 Braunform GmbH honored again four employees – together they can look back on 115 years

Nowadays, it is a special feature to work successfully in the same company for more than 25 or even 30 years. Especially if the jubilees prove loyalty to the company since their training. The management thanked everyone for their "personal commitment and solidarity to the company".

Investments in the future – new machines 2nd half of 2016

Looking back, investments in the machinery were also in the second half of 2016 of great importance to us. Here are the details:

A new **milling machine of the brand Exeron, type MP7 5-axis with Erowa changer Compact 80**, enables the processing of electrodes and steel. This investment allows an existing milling machine to be used in the department Ära. A **precision portal grinding machine from Stöckel, type FD 20/80 NC-T** with a grinding range of 2,000 mm x 800 mm and a weight of approx. 18 tons also serves as a replacement investment. This machine will be put into operation at the beginning of the new year. Three **injection mold machines from Engel (Type e-victory 50/80, 310/120, 170/120)** with a clamping force of up to 120 tonnes were put into operation in the new production building in Endingen.

Events

01.02. - 03.02.2017:
PHARMAPACK, Paris, France

Merry Christmas | Frohe Weihnachten | Joyeux Noël | Feliz Navidad

We wish you and your families a Merry Christmas and a Happy New Year!

Best Regards
Your Braunform Team
