Online-News for Plastics and Pharma Technologies

inForm.Intro

Dear Readers,

2017 – a lot has happened this year. We have achieved important objectives and can look back on a successful business year. We would also like to take this opportunity shortly before Christmas to thank you for your trust and the good cooperation. We are already looking forward to the common challenges expected for the new year.

With best wishes for a Merry Christmas together with your families and a healthy and successful New Year!

Pamela Braun

Review investments in machinery 2017

Braunform, as an innovative family company, set great emphasis on investments in machinery. Also in 2017 our machine pool could be renewed, extended and technologically advanced due to the clever strategy of our technology team. The priorities for the mold shop were to upgrade the measuring department, the HSC and mold frame milling as well as new technologies for the flat grinding. The reorganisation and machinery investments for the technology center were also important.

Three replacement investments were made for the flat grinding area: one planer type grinding machine from the

company Stöckel as well as two surface grinding machines from the company Amada for the processing of medium and large inserts in the flat and profile grinding. The sector of measuring was extended by two new Zeiss measuring machines to ensure flexibility in steel and article measurement. A new automated 5-axis Exeron milling machine with a spindle speed up to max. 42,000 rpm is used for capacity expansion in the HSC milling area. The department ÄRA was also expanded with a tactile Zeiss measuring machine to control mold insert automated, perform 3D comparisons and preset electrodes. In order to primarily increase the capacity for eroding, three machine investments were realized: an Agie wire cutting machine and EDM vertical eroding machine, each with corresponding Erowa workpiece changer. Furthermore, a Krumm-tec cleaning system ensures an effective and thorough cleaning of steel parts, electrodes and clamping devices.

“Braunform – we act” – social position firmly anchored in company’s policy once again this year

As a regional SME Braunform assumes its social and cultural responsibility to its employees and the society. The health of our staff and social commitment are important elements of this responsibility.

High-quality training on an elevated level

The training is an essential pillar of the company’s strategy and personal development for Braunform – not only because of increasing demand for specialists due to demographic change. The company has been relying on qualified specialists from its own ranks for more than 40 years, and has set itself the task of providing young people with a high-quality start into their working life.
