

Issue 08.2020

About us.

Braunform is systemically relevant

Our primary objective is to protect the health of our employees as well as to ensure the continuation of business operations. After all, among other industries, the injection molds produced and their articles for life-supporting medicines make a significant contribution to the health of patients. We are particularly pleased about the trust our customers have placed in us by placing important key orders for diagnostics in the fight against the Covid-19 pandemic. In order to meet its social and economic responsibilities, Braunform places the highest priority on maintaining the supply chain with a positive look to the future thanks to a good order situation.

Commitment

Investments 2020.

Expansion of machinery

In addition to highly qualified specialists and an excellent manufacturing strategy, state-of-the-art and efficient machines are a significant factor of our competitiveness. In 2020, our machining park has been technologically advanced and expanded by investments in our mold shop especially in the fields of cylindrical grinding and erosion.
