

## PRESS RELEASE

---

### **Braunform invests in its training center**

As an innovative family business Braunform attaches great importance to investing in machinery in order to expand and technologically adapt it to future market requirements. In addition to investments in various areas of the mold shop, the training center is also part of the investment strategy this year. Two new milling machines can be put into operation these days.

The new CNC milling machines of the manufacturer FPS Type 620 M-NC are equipped with modern Heidenhain controls TNC620 FS with touch screen. Thanks to their user-friendliness and good ergonomics, they are an ideal first step into the milling process. A key can be used to choose between a manual operating mode for beginners or CNC machining for more advanced specialists. The trainees are thus kept up to date with the latest technology and are ideally equipped for working in the specialist departments.

The medium-sized company has always focused on the topic of training and places great emphasis on improving the quality of training sustainably. In addition to supervision by a highly qualified training team, modern training directly in the production process with the latest machine equipment is an essential component of the training concept. Each year 12-14 apprentices and students of the DHBW are intensively trained and taught. On average, more than 40 junior employees pass through their education in the company in parallel. Braunform is also creating career prospects for the training period in 2021 and is currently still offering apprenticeships as toolmakers (m/f/d) and mechatronic engineers (m/f/d).

## Picture survey:

With two new milling machines Braunform lays another cornerstone for technology and innovation.

## Braunform at a glance

Founded in 1977, Braunform with 375 employees is now considered to be an important employer in the region. The long-term oriented family-owned company based in Bahlingen and Edingen am Kaiserstuhl is an industrial solution provider and strategic partner in the field of injection molds. Braunform is one of the world's leading companies in the plastics processing industry and has set itself the goal of manufacturing injection molds with which - according to the current state of the art - plastic as a raw material has no alternative or is more resource-friendly than the possible alternative. The fully air-conditioned precision mold shop with the latest production technology serves industries such as Pharma, Personal Care, Water Technology and Automotive. In addition, pharmaceutical products are produced in state-of-the-art clean rooms with highest quality standards for customers worldwide.

The certified company relies entirely on "Engineering Made in Germany" and a high trainee percentage (12 %). The sustainability statement, which is firmly anchored in the company's policy, commits Braunform to constantly improving its own CO2 footprint. The company's corporate health management as well as the social commitment are given high priority. As one of the best employers in the field of SME's in Germany, Braunform received the "Top Job" award for the third time in 2020, after 2014 and 2017.
