

PRESS RELEASE

Cooperation for career orientation

Braunform signs cooperation agreement with high school

In order to strengthen the exchange between companies and schools, Braunform GmbH has signed a cooperation agreement with the high school in Kenzingen, Germany. The cooperation takes place within the framework of career orientation at the high school and aims to accompany students holistically in their career exploration.

Vocational orientation at the high school (BOGY), which is integrated into the school subject Business, Career and Study Orientation (WBS), begins in grade 8. In order to support and accompany students in their career choice, for example, career taster days and 5-day internships are offered. Career exploration enables young people to gain an initial insight into the world of work and establish contacts with companies.

Arousing interest in apprenticeships

For more than 40 years, the regionally based family business has been focusing on qualified training and has made it a priority to provide young people with a high-quality start to their professional lives. For this reason, the topic of internships also enjoys a high priority. As a cooperation partner, Braunform, for example, reserves internships for students in order to give them an understanding of technical and commercial professions. Accompanied by internship mentors, the young people get to know the training center or the various departments after a tour of the company, thus gaining valuable practical experience.

"Many young people who have completed an internship with us later apply for an apprenticeship," says HR Manager Oliver Bornhäuser, adding, "This has a considerable advantage. Because they already know the company. Internships are possible throughout the year for the "complete range" of apprenticeships. Furthermore, as part of the school campaign, student seminars, applicant training, Girls' Day, training fairs and the company's annual training day are firmly anchored in the schedule.

Braunform at a glance

Braunform GmbH, founded in 1977 by Erich Braun in Bahlingen a. K., today is one of the world's leading partners in the field of plastic mold making. The long-term oriented family business has made it its goal to produce injection molds for whose end products - according to today's standards - plastic as a raw material is without alternative or more resource-saving than the possible alternative. The unique selling point of the mold-shop is the pharmaceutical production in own clean rooms according to GMP C and D. Today, Braunform GmbH is managed by Mrs. Pamela Braun (Managing Partner) and Mr. Emmanuel Foyer (General Manager). With 365 employees, the company is considered to be an important employer in the region in the southwest of Germany.

Mission Statement

Molding Your Visions: We mold the needs of our customers. We provide solutions to effectively produce our customers' products using clean, state-of-the-art technology with core competencies in mold making, injection molding and full service.

Braunform in Detail

Braunform specializes in the production of multi-component molds, multi-cavity molds, stack molds, molds for medical technology (MED Mold®) as well as fast, long-lasting rotary tables. The fully air-conditioned precision mold shop with state-of-the-art production technology serves – amongst others – industries like pharmaceutical, personal care, water technology, electrical and automotive. For the pharmaceutical industry, sophisticated manufacturing processes, including automated assembly and stamping, are implemented in state-of-the-art clean rooms in accordance with GMP C and D. In our own technology center, injection molding machines for 2K (with silicone gating) and 3K applications can be used for pre-series production. Due to project management and full-service engineering, shortest time-to-market times are made possible and costs are significantly reduced. Key elements are

process reliability, shorter cycle times, increased output and highest product quality in combination with support and consulting for sustainable production processes. The company is certified according to DIN EN 13485 / 15378 / 9001 / 14001 / 50001.

The company is fully committed to "Engineering Made in Germany". This includes not only a highly qualified, enthusiastic team and a high proportion of apprentices (10%), but also highest quality and technological leadership. The declaration of sustainability, which is firmly anchored in the company's policy, commits the company to constantly improving its own CO2 footprint. In 2020, the company was also awarded a silver medal by the sustainability platform "Ecovadis". Both company health care and social commitment are given high priority. As one of the best employers in Germany, Braunform received the "Top Job" award for the third time in 2020, following 2014 and 2017.
