

PRESS RELEASE

Successful final examination – All 11 journeymen from the graduation year spring 2022 & 2023 remain Braunform

A total of 11 apprentices have successfully completed their 3½-year training as tool mechanics or mechatronics engineers. The management of Braunform GmbH congratulates the skilled workers on reaching this milestone. Fabian Broll, Florian Danzeisen, Harald Hehn, Markus Schweizer, Manuel Bühler, Jonas Flamm, Alex Hitschfeld, Lucas Köbele, Kai Pulter, Simon Zimmermann (all tool mechanics) and Fabio Wiedemann (mechatronics engineer) were taken on in various specialist departments following their successful training. In their new positions, they will strengthen the business areas milling, surface grinding, cylindrical grinding, quality assurance mold making, die-sinking EDM, modification and repair departments, and technical services.

Braunform has been training apprentices for over 40 years. The medium-sized company attaches great importance to the quality of its training and the individual advancement of its junior staff. Each apprenticeship year, 12-14 apprentices are intensively instructed and taught. On average, around 40 apprentices and students complete their training at the company.

Braunform at a glance

Braunform GmbH, founded in 1977 by Erich Braun in Bahlingen a. K., today is one of the world's leading partners in the field of plastic mold making. The long-term oriented family business has made it its goal to produce injection molds for whose end products - according to today's standards - plastic as a raw material is without alternative or more resource-saving than the possible alternative. The unique selling point of the mold-shop is the pharmaceutical production in own clean rooms according to GMP C and D. Today, Braunform GmbH is managed by Mrs. Pamela Braun (Managing Partner), Mr. Emmanuel Foyer (General Manager) and Mr. Joachim Stiller (General Manager). With 365 employees, the company is considered to be an important employer in the region in the southwest of Germany.

Mission Statement

Molding Your Visions: We mold the needs of our customers. We provide solutions to effectively produce our customers' products using clean, state-of-the-art technology with core competencies in mold making, injection molding and full service.

Braunform in Detail

Braunform specializes in the production of multi-component molds, multi-cavity molds, stack molds, molds for medical technology (MED Mold®) as well as fast, long-lasting rotary tables. The fully air-conditioned precision mold shop with state-of-the-art production technology serves – amongst others – industries like pharmaceutical, personal care, water technology, electrical and automotive. For the pharmaceutical industry, sophisticated manufacturing processes, including automated assembly and stamping, are implemented in state-of-the-art clean rooms in accordance with GMP C and D. In our own technology center, injection molding machines for 2K (with silicone gating) and 3K applications can be used for pre-series production. Due to project management and full-service engineering, shortest time-to-market times are made possible and costs are significantly reduced. Key elements are process reliability, shorter cycle times, increased output and highest product quality in combination with support and consulting for sustainable production processes. The company is certified according to DIN EN 13485 / 15378 / 9001 / 14001 / 50001.

The company is fully committed to "Engineering Made in Germany". This includes not only a highly qualified, enthusiastic team and a high proportion of apprentices (10%), but also highest quality and technological leadership. The declaration of sustainability, which is firmly anchored in the company's policy, commits the company to constantly improving its own CO2 footprint. In 2020, the company was also awarded a silver medal by the sustainability platform "Ecovadis". Both company health care and social commitment are given high priority. As one of the best employers in Germany, Braunform received the "Top Job" award for the third time in 2020, following 2014 and 2017.
