

PRESS RELEASE

Braunform welcomes 11 new young talents – Together into a strong future

Starting the new training year with fresh energy: This year, Braunform is once again welcoming eleven motivated trainees who are beginning their professional journey with the company. These young talents will receive qualified training in various technical and commercial professions – they are the skilled professionals of tomorrow. The training programs at Braunform this year include: Tool Mechanic, Mechatronics Technician, Industrial Clerk, Plastics and Rubber Technologist, and Technical Product Designer.

Training with Heart and Mind

At Braunform, vocational training has always held great importance. With a training rate of over 10% and around 40 apprentices and students being supported, the company relies on a proven concept: hands-on, individually guided, and future oriented. Experienced trainers and mentors accompany young talents from day one, fostering both professional and personal development.

More Than Just Training – Experiencing Community

A special highlight is the annual apprentice excursion, which once again sparked enthusiasm this year. Apprentices from all training years visited the company Arburg, where they enjoyed a joint breakfast in the cafeteria following a brief company presentation. During the subsequent tour of the facility, they gained exciting insights into production and the individual steps involved in manufacturing an injection molding machine. After the informative part, things got sporty: at football golf, the apprentices were able to showcase their skills on the 18-hole course. A delicious barbecue buffet rounded off the day. The atmosphere was excellent, and fun was definitely not in short supply. In addition to such events, Braunform also offers opportunities for internships abroad, joint workshops, and regular apprentice meetups – because Braunform firmly believes: those who feel comfortable learn better and grow beyond themselves.

Looking Ahead to the Future

The search for new talent for 2026 has already begun. Braunform is excited to once again welcome dedicated young individuals in the coming year – and to shape the future together with them.

Braunform at a glance

Braunform GmbH was founded in 1977 by the Erich Braun family in Bahlingen am Kaiserstuhl and is one of the world's leading partners in the field of plastic mold making today. As innovative company in the plastics industry, Braunform develops and manufactures high-precision injection molds that enable customers to produce sophisticated end products efficiently and reliably. With more than 30 years of experience in the pharmaceutical and medical market, Braunform has established itself as a reliable partner for these highly regulated industries. A particularly unique selling point is the company's own MED Mold® standard - a quality promise for maximum precision and cleanroom suitability.

A further unique selling point of the mold-shop is the production in own clean rooms according to GMP C and D. Braunform GmbH is currently managed by Ms. Pamela Braun (Managing Partner), Mr. Emmanuel Foyer (Managing Director) and Joachim Stiller (Managing Director). With around 380 employees, Braunform is a major employer in the South Baden region and stands for sustainable growth, technological excellence and social responsibility.

Mission Statement

Molding Your Visions: We mold the requirements of our customers. We provide solutions to effectively produce our customers' products using clean, state-of-the-art technology with core competencies in mold making, injection molding and full service.
