

PRESS RELEASE

New Faces. New Ideas. A New Future at Braunform.

Bahlingen/Endingen. On September 1, Braunform welcomed eight new apprentices. Six are beginning their apprenticeships as toolmakers, and two others as mechatronics technicians. They have chosen a career with a future: high-tech toolmaking “Made in Germany,” real career prospects, and the chance to work on projects for customers worldwide from our locations in Bahlingen and Endingen.

The new trainees were officially welcomed to the company over the past few days. “Every apprenticeship begins with curiosity, courage, and an opportunity. This is exactly the opportunity we want to offer young people,” says Oliver Bornhäuser, Commercial Director at Braunform.

What many people don’t know: Numerous current specialists and managers at Braunform began their careers as apprentices or DHBW students. For the company, therefore, training is far more than just filling open positions. It is an essential component of the success and growth of the company, which was founded in 1977.

With around 40 apprentices and dual-track students, Braunform is one of the region’s leading companies in terms of training. In addition to technical qualifications, the focus is on team spirit, personal development, and a passion for technology.

Not just another run-of-the-mill job—but a meaningful start to a career: While the new apprentices are taking their first steps at the company, Braunform is already looking ahead: In 2027, Braunform will once again support young people on their path to professional life and a skilled apprenticeship. After all, even great careers often begin quite unspectacularly—for example, with the first orientation evening at Braunform.

Braunform at a glance

Braunform GmbH was founded in 1977 by the Erich Braun family in Bahlingen a. K. / Germany and is one of the world's leading partners in the field of plastic mold making today. The company develops and manufactures high-precision injection molds that enable customers to manufacture sophisticated products efficiently and reliably.

What began as a regional family business is now a global partner, particularly for the pharmaceutical industry. Using state-of-the-art technology and highest precision, the company designs and manufactures injection molds that enable the production of pharmaceutical products – thereby contributing to improving the quality of life worldwide.

With over 30 years of experience in the pharmaceutical and medical market, Braunform has established itself as a reliable partner for these highly regulated industries. A unique selling point is the company's own MED Mold® standard – a quality promise for maximum precision and cleanroom suitability. Another unique selling point of the mold making division is the production of pharmaceutical technology in its own cleanrooms in accordance with GMP C and D.

Braunform GmbH is currently managed by Ms. Pamela Braun (Managing Partner), Mr. Emmanuel Foyer (Managing Director) and Joachim Stiller (Managing Director). With around 370 employees, Braunform is a major employer in the South Baden region and stands for sustainable growth, technological excellence and social responsibility.
